

FOLLOW UP/DEBRIEFING QUESTIONS

The following debriefing questions are a critical part of the process to reflect on what occurred. These are questions your team should consider and discuss in your review process.

1. What parties were involved?

2. List the incident that occurred?

3. Identify the source of the problem and what could be changed to prevent future reactions?

4. How did the emergency procedure work?

Was the Emergency Care Plan (ECP)/Food Allergy Action (FAAP) followed?

Epinephrine auto-injector administered by whom?

5. When was the last emergency drill?

6. Was emotional consideration given to the student or other students who witnessed the anaphylactic reaction?

**7. Was the student taken to the emergency room by emergency medical services?
If no, please describe.**
